

TwitterStatApp

~~Another~~ Twitter client application
with

PRIVACY in mind

TwitterStatApp

~~Another~~ Twitter client application
with

PRIVACY in mind

Coded with

Java™

```
public static PendingIntent  
    Intent intent = new Intent  
    intent.setAction(ACTION_DELETE_NOTIFICATION)  
    return PendingIntent.getBroadcast(context, 0,  
}
```

Why designing ~~Another~~ Twitter client application?

Do you want to keep up to date with events in the world?

Don't want to miss the news you are interested in?

BUT

PRIVACY is the most important thing for you

SO

You do not want to sign up on Twitter

50%

TwitterStatApp – designed right for you
with **PRIVACY** in mind

FO·MO

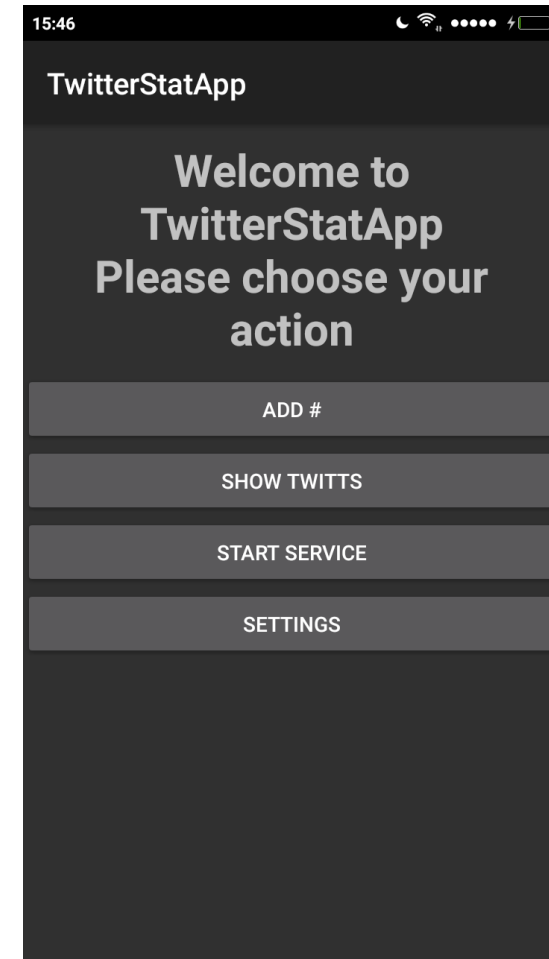

FEAR OF MISSING OUT

anxiety that an exciting or interesting event
may currently be happening elsewhere.

Key problems solved by the software

- constant access to interesting news from around the world,
- no registration and acceptance required,
- convenient in everyday use notifications,
- lightweight & fast app for Android operated smartphones.

YEAH!

Just lightweight as Facebook Lite
But
specially created for Twitter!

PRIVACY in mind

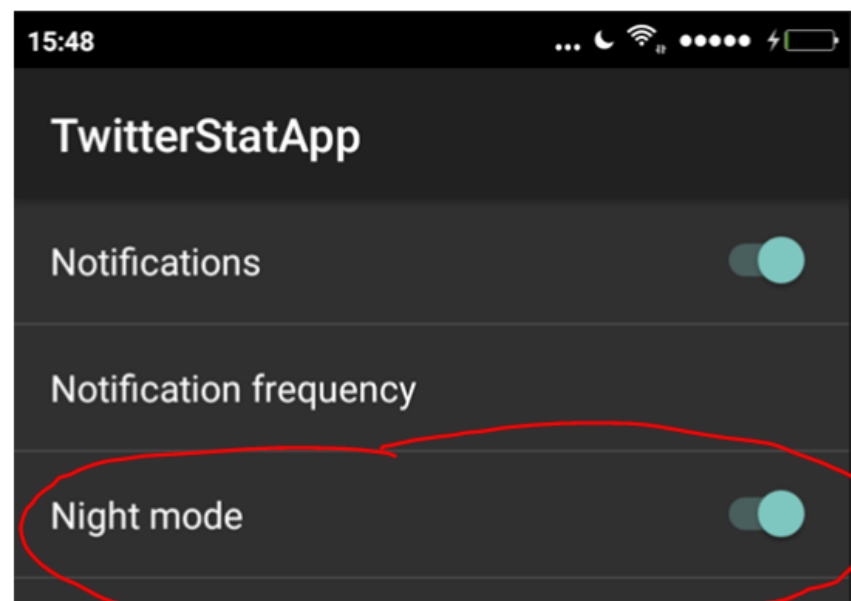

Key functions of the software

- it's working!,
- the possibility of observing many hashtags,
- notifications about new Twitts,
- adjustable frequency of notifications,
- clear message list.

Something designed especially for
 **wykop.pl** users...

Night mode!

Use cases diagram

Description of use cases

UC1: Configure an application

UC2: Define a list of hashtags to follow

UC3: Remove defined hashtags

UC4: Get the notifications about new Tweets

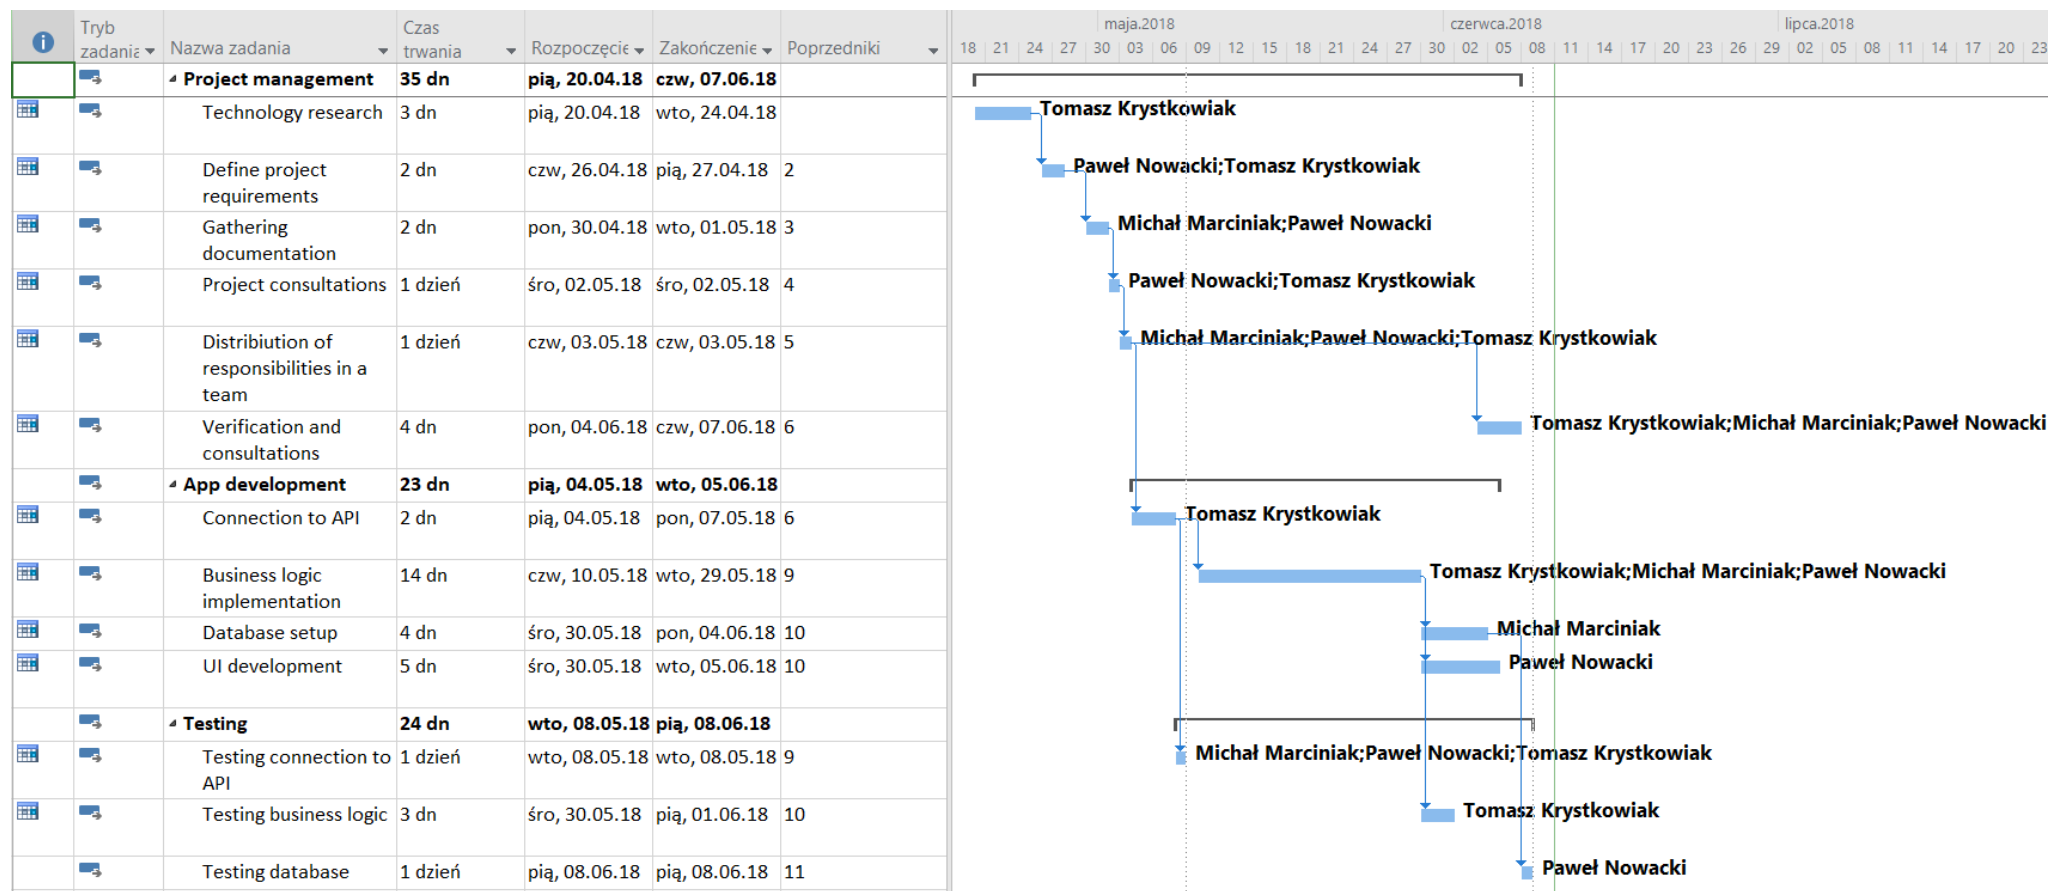

UC5: Receive list of the newest Tweets with defined hashtags

UC6: Get the summary data (statistics) about followed hashtags

UC7: Perform a personalized search query

Project run

Problems met and... solved?

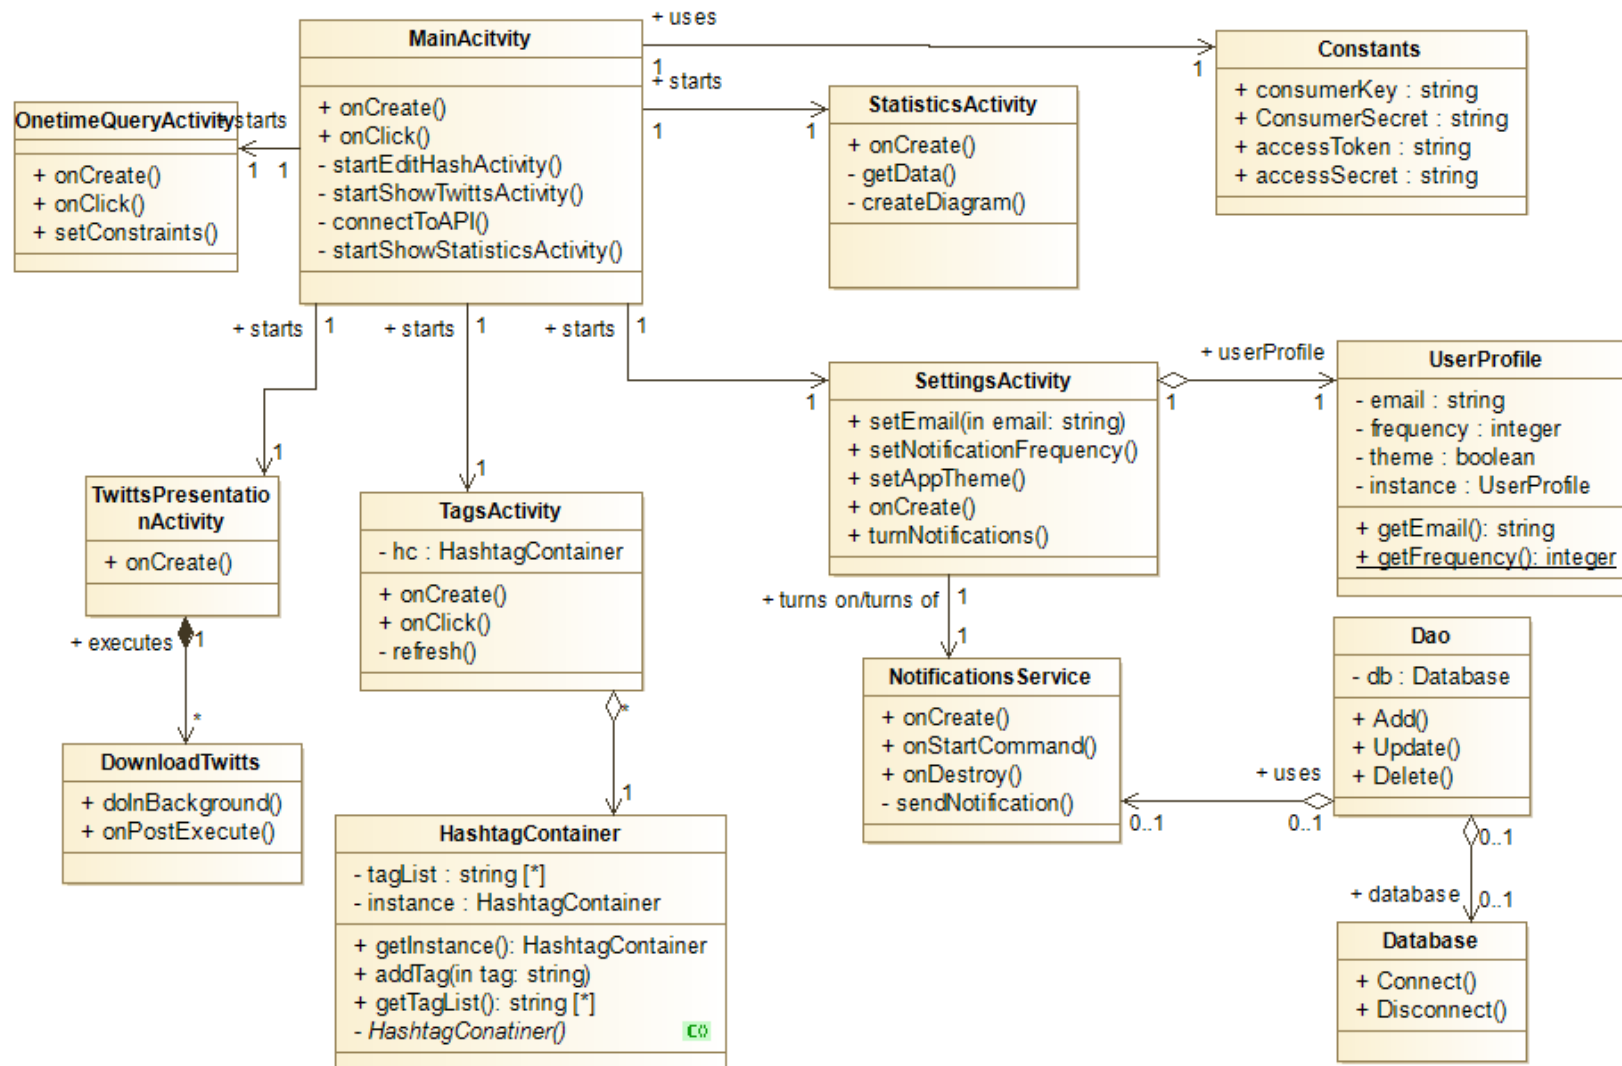

Of course we were prepared for this risks from our Risk Assessment document:

- Poor distribution of responsibilities - lack of rigid work schedule due to the nature of the team's work (other duties),
- No experience in similar projects (GitHub support, insufficient knowledge about Android),
- Work on the project in a remote form - extended work time, difficulties with responses and verification of work progress.

So... we experienced it ourselves

**There's always room
for improvement!**

```
1.  /*** Just for fun! ***/
2.  public class Founders {
3.      public static void main(String[] args) {
4.          System.out.println("Designed, planned, developed, shaped, coordinated, contributed,
           provided & engineered by: Tomasz Krystkowiak, Michał Marciniak, Paweł Nowacki");
5.      }
6.  }
```

What are you waiting for?

A problem has been detected and windows has been shutdown to prevent damage to your computer.

DRIVER_IRQL_NOT_LES_OR_EQUAL

If this is the first time you've seen this stop error screen, restart your computer, If this screen appears again, follow these steps:

Check to make sure any new hardware or software is properly installed. If this is a new installation, ask your hardware or software manufacturer for any windows updates you might need.

If problems continue, disable or remove any newly installed hardware or software. Disable BIOS memory options such as caching or shadowing. If you need to use Safe Mode to remove or disable components, restart your computer, press F8 to select Advanced Startup Options, and then select Safe Mode.
